

Light Hoop Installation Directions

Pre Install:

· Inspect the packaging and product for signs of damage and report immediately to carrier. Keep all packaging for filing a damage claim if needed. Jeeperman, LLC is not responsible for shipping damages!

This is a fairly straight forward installation for most owners taking about 30 minutes. If after reading the installation you do not feel confident in the procedure, we strongly recommend taking this to a competent shop to ensure proper installation for years of trouble free service.

It would be advisable to read these instructions, in their entirety, BEFORE starting the installation. If you are uncomfortable with this, please e-mail or contact us or seek a qualified professional installer.

Kit Contents:

1 – Light Hoop
And these instructions

Required tools and supplies:

SAE Wrenches
TORX Wrenches
Lok-Tite thread locker

· Familiarize yourself with the parts. Verify all parts and hardware are accounted for and contact us for any replacements.

The Installation:

These installation directions are furnished as a guide; your vehicle may vary.

· Remove any existing accessories such as lights or winches and mounts if their location will interfere with the light hoop mounting. Remove existing top bumper bolts and remove tow hooks if so equipped. Most Wranglers will have 4- T-55 Torx bolts that may be re used for mounting light hoop. Most OEM tow hooks may be re-used by switching left and right hand hooks and reinstalling on top for the light hoop brackets.

· Position the light hoop (and tow hooks if installing at this time) onto the frame rails. Install all bolts loosely to allow for minor movement until all bolts are in place. Once all bolts are in place then tighten all to 40 ft. lbs with a small amount of Lok-Tite on the threads.

· Reinstall any previously removed accessories per manufacturer's specifications. Lights may be installed in a variety of positions both over and under the light tab.

On the FHP model another two lights may be installed at the side support tube bases.

See website www.Jeeperman.com for any product updates.

If you have any questions or concerns about the product or installation, feel free to contact tech support at 509-340-3911 or info@jeepman.com. We also welcome your feedback and input.
